

# World in 2050: economic prospects and public power

Martin Wolf, Associate Editor & Chief Economics Commentator, *Financial Times* 

Dulwich Picture Gallery Contextual Lecture Series 2018

8<sup>th</sup> May 2018

Dulwich Picture Gallery, Dulwich, London

### **Public Power and Economic Prospects**

- Global challenges
- Politics, power and world order
- Brexit Britain
- Conclusion

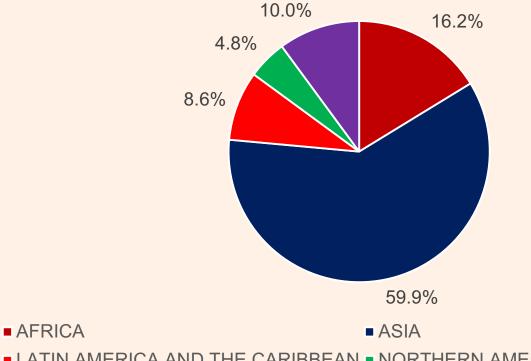

### **Global challenges**

- Population grows
- Asia rises
- Poverty falls
- Inequality declines
- Humanity urbanises
- Climate worsens
- Productivity slows
- Secular stagnation
- Debt remains
- Globalisation stalls

### 1. Global challenges: population

#### **HUMANITY IS ASIAN**

#### WORLD POPULATION 2015 (United Nations)

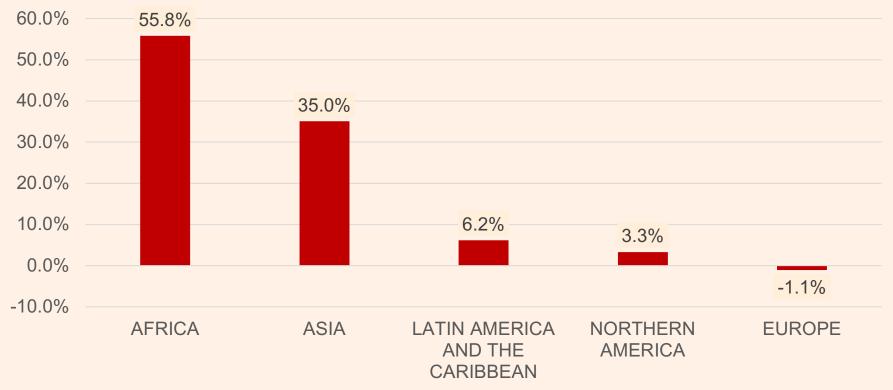

- LATIN AMERICA AND THE CARIBBEAN NORTHERN AMERICA
- EUROPE

### 1. Global challenges: population

#### **IT IS BECOMING AFRICAN**

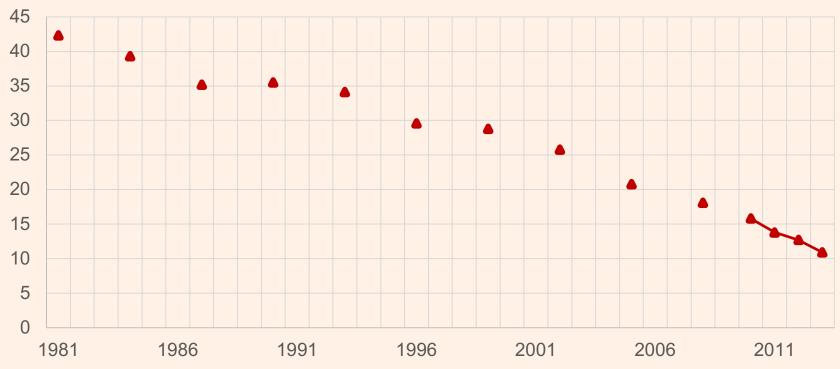

#### SHARES IN GROWTH IN POPULATION 2015-2050 (UN MEDIUM VARIANT)

### 1. Global challenges: poverty

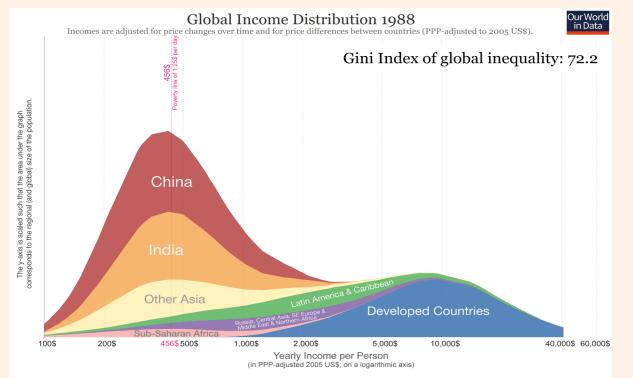

**HOW MASS DESTITUTION HAS FALLEN** 

### 1. Global challenges: inequality

#### **A WORLD OF HUGE INEQUALITIES**

Data source: Lakner and Milanovic (2015) – Global Income Distribution: From the Fall of the Berlin Wall to the Great Recession, World Bank Economic Review. 'Other Asia' refers to Asia without India, China, Hong Kong, Israel, Japan, Korea, Singapore, and Taiwan.

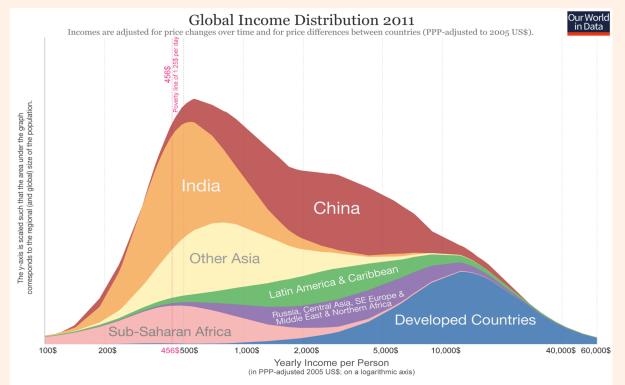

Developed countries' are the EU-27, Australia, Bermuda, Canada, Hong Kong, Iceland, Israel, Japan, Korea, New Zealand, Norway, Singapore, Switzerland, Taiwan, and the United States. The categorisation of countries is stable over the entire time period 1988-2011.

### 2. Politics and power

- Democratic recession
- Global order

### 2. Politics and power: democratic recession DEMOCRACY AND GLOBALISATION

#### GLOBALISATION AND DEMOCRACY (Source: "Our World in Data" and Center for Systemic Peace)

•Yet the world is now in a "democratic recession":

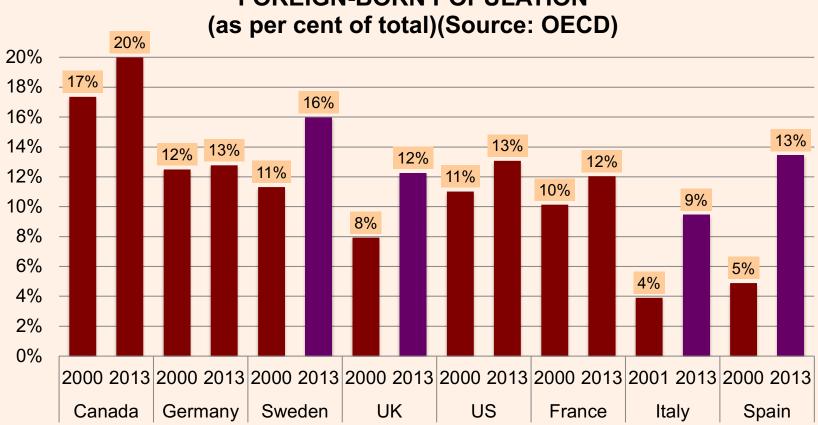

According to Freedom House 2017 Annual Report, "A total of 67 countries suffered net declines in political rights and civil liberties in 2016, compared with 36 that registered gains. This marked the 11<sup>th</sup> consecutive year in which declines outnumbered improvements."

 Moreover, "in 2016 it was established democracies – countries rated "Free" in the report's ranking system – that dominated the list of countries suffering setbacks."

 Also, according to Roberto Foa and Yascha Mounck, "Over the last three decades, trust in political institutions such as parliaments or the courts has precipitously declined across the established democracies of North America and Western Europe."

•Trust has been lost in both the democratic (political) and capitalist (economic) systems and this is true not only in emerging and developing countries, but also in advanced countries

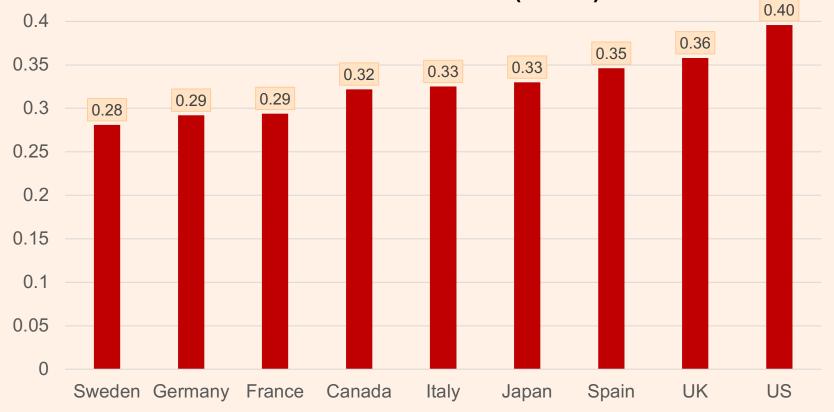

#### **IMMIGRATION**

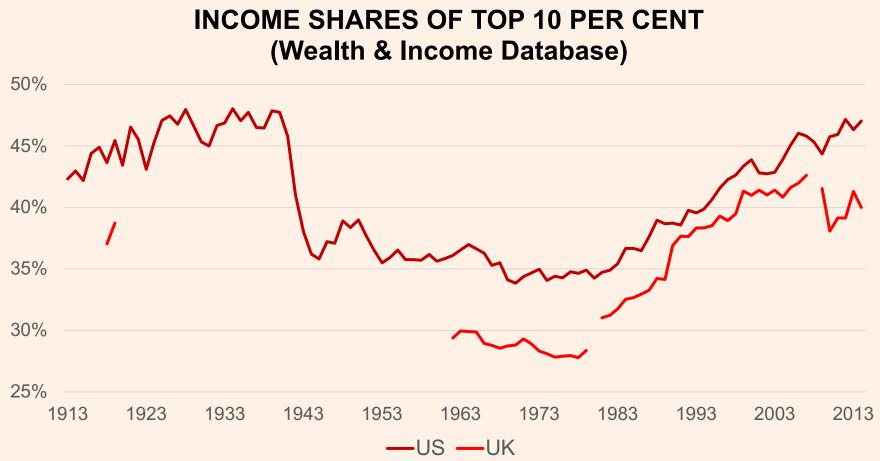

### FOREIGN-BORN POPULATION

**INEQUALITY: WHERE IT IS HIGHEST** 

#### GINI COEFFICIENT OF 2013 HOUSEHOLD DISPOSABLE INCOME (OECD)

**INEQUALITY: DOWNS AND UPS IN THE US AND UK** 

#### **POST-CRISIS BLUES**

#### PROPORTION OF HOUSEHOLDS WITH FLAT OR FALLING REAL INCOMES FROM WAGES AND CAPITAL 2005-14 (Source: McKinsey)

- Our politics have become fragile: *anything can happen*
- "Populism" has been a particularly important political result

•Populism is *not* the same thing as the idea that political and economic elites should pay more attention to the interests of the majority of the people.

- That would be good politics and good policy.
- Populism as a political philosophy is something different

#### • Populists, be they of the left or right:

oDistrust established institutions

•Distrust institutions that check the "will of the people": courts, established media and the bureaucracy

Reject "experts".

 $\circ \mbox{Suspect}$  free markets, free trade and capitalism

oAre hostile to those not part of "the people"

• "The elites" are seen as corrupt and treacherous:

 $\circ$ They are, therefore, politically illegitimate and so are the institutions they control

•These attitudes can lead to autocracy

### 2. Politics and power: global order

•The world has been brought together by technology and the impact of humanity has radically increased

•This necessitates an ability to deliver global public goods: financial stability and open trade; security; and protection of the environment

•No state can deliver these things on its own, not even a superpower

•We have to create supra-national regimes

•These are technocratic or "expert" regimes

•But creating such regimes, while essential, clashes with simplistic versions of democratic sovereignty

•This is a painful dilemma

### 3. Brexit Britain

- The referendum result has already been costly
- "Canada" is the likely destination
- The costs could be substantial and enduring

### 3. Brexit Britain THE CANADA MODEL?

UK's 'red lines' point to the Canadian model

	Model							
	Norway	Iceland	Liecht.	Switz.	Ukraine	Turkey	S Korea	Canada
						3	<b>(</b> )	<u>.</u>
UK 'red lines'	V	T		U		9		
No ECJ jurisdiction	Χ	Χ	X		X			
No free	Y	Y	X	Y				
movement	~	~	Λ	Λ				
No substantial	Y	Y	X	Y

### 4. Conclusion

- The world is going through huge changes and the West is in steep relative decline
- States provide the framework of law and the political stability on which a successful international order depends
- The most successful basis of international co-operation has been liberal democracy and open economies
- But democracy is now weakening and rivalries among states are rising
- Brexit is a local symptom of rising nationalism
- The election of Mr Trump is the leading global symptom
- We are seeing the end of Pax Americana and opening of the "Thucydides trap"
- What follows? That is the biggest question
